

Big Harp George Song and Harmonica Keys  
(chromatic harmonica unless otherwise noted)

On George's first four albums, he switches harps with chromatic just as diatonic players do, using first, second, and third positions, with a tune on diatonic on each album (usually in first or third position). As of his fifth album, George began playing all songs on a C chromatic harp regardless of song key (with the exception of one song on diatonic), usually a 12-hole version.
